

MedCart Mobile App UI/UX Specification

App Overview

App Name: MedCart

MedCart is a clean, modern pharmacy application that allows users to order medicines, upload prescriptions, track deliveries, and manage medicine refills with a simple and accessible interface.

Design System

Primary Color

- Green (#22C55E)

Accent Color

- Light Green (#BBF7D0)

Background

- White (#FFFFFF)

Text

- Primary: Dark Gray (#1F2937)
- Secondary: Gray (#6B7280)

Success

- Green (#16A34A)

Error

- Red (#EF4444)
-

UI Style

- Rounded corners (16–20px)
- Soft shadows
- Minimal and modern design
- Large touch-friendly buttons

- Smooth page transitions
 - Clean typography
 - Plenty of white space
 - Simple line icons (Lordicon-style animations where appropriate)
 - Fast and lightweight interface
-

Bottom Navigation

1. Home
2. Categories
3. Cart
4. Orders
5. Profile

The bottom navigation should remain visible throughout the app with smooth transitions and clear active states.

Home Screen

Display a greeting at the top:

Good Morning 🖐️

Below the greeting:

- Search bar
- Placeholder: "Search medicines..."

Users should be able to search medicines directly from the database.

Categories

Display category cards in a grid.

Categories:

- Tablets
- Baby Care
- Diabetes
- Personal Care

Each category should include a simple icon and rounded card.

Today's Offers

A horizontally scrollable section showing discounted medicines.

Each card should include:

- Medicine image
- Name
- Price
- Discount badge
- Add to Cart button

Popular Medicines

Another horizontal list displaying:

- Image
- Medicine name
- Price
- Rating
- Quick Add button

Upload Prescription

A large green CTA button:

"Upload Prescription"

On tap:

- Open WhatsApp automatically
- Pre-fill a message requesting prescription submission
- User attaches the prescription image directly in WhatsApp

No file storage is required in the MVP.

Order Tracking

Show the latest order status card.

Example:

- Preparing
- Packed
- Out for Delivery
- Delivered

A progress indicator should visually display the current order stage.

Cart Screen

- Cart items
 - Quantity controls
 - Remove item
 - Price summary
 - Delivery charge
 - Checkout button
-

Orders Screen

Display order history.

Each order should show:

- Order ID
 - Order date
 - Status
 - Total amount
 - View Details
-

Profile Screen

Display:

- Profile information
- Saved address
- Payment methods
- Order history
- Medicine refill reminders
- Dark mode toggle
- Logout

Premium Features

Prescription Upload

Redirect users to WhatsApp for prescription submission.

Chat with Pharmacist

Simple in-app chat interface for medicine-related questions.

Live Order Tracking

Real-time delivery status with map support.

Wishlist

Users can save medicines for future purchase.

Medicine Refill Reminders

Schedule notifications reminding users to reorder medicines.

Dark Mode

Provide a complete dark theme while maintaining accessibility.

Payments

Support:

- UPI
 - Credit/Debit Cards
 - Cash on Delivery (COD)
-

MVP Scope

Include:

- Login
- Home
- Search
- Categories
- Medicine Details
- Cart
- Checkout
- WhatsApp Prescription Upload
- Orders
- Profile

Advanced features such as live tracking, chat, refill reminders, and online payments can be added in future updates.

Overall Experience

The interface should feel clean, trustworthy, modern, and simple enough for users of all ages. Navigation should be intuitive, buttons should be large and easy to tap, and the visual style should inspire confidence similar to leading pharmacy applications while maintaining MedCart's own identity.
